

## Soga Product Information Sheet

### Computerized Inspection Database (CID)

<b>Name:</b>	Computerized Inspection Database
<b>Acronym:</b>	CID
<b>Brief Description:</b>	Drawing-based inspection database which allows access to data via asset drawings
<b>Front End Software Options:</b>	MS Access 2000 or MS Access 2003
<b>Database Software Options:</b>	MS Access (any version)
<b>Functionality Details:</b>	MS Access (any version) or Oracle (any version) or SQL Server (any version)

CID is a Computerized Inspection Database handling inspection data gathered through various data acquisition technologies and linked to inspection drawings. The system utilizes the logical links between engineering inspection drawings and their corresponding inspection data. Data can be retrieved directly from the individual equipment items within the drawings.
